Current Controversies in Joint Replacement

Dear Friends,

It is time again for the annual mega event! We bring you eminent Indian and International faculty to confront and dissect the current controversies in arthroplasty to help you refine your understanding and crystallize your thoughts in the face of controversies. Choice of implant, approach, navigation or custom jigs, short femoral stems or standard implants, and controversies surrounding the perioperative care of the arthroplasty patients will be discussed threadbare. Nearly half dozen exciting surgeries are planned for demonstration by the masters in the field. These include, among others, navigated tissue sparing surgery using short stem and implantation of the latest implants introduced in the Indian market. Interactive sessions will allow you to further address your queries and concerns and the evening reception will present you with an opportunity to closely interact with the distinguished faculty.

I invite you all to join us to make this a memorable event and improve the care we provide to our patients.
